System Information

Professional color, highly productive

Wide format color print, copy and scan system

Professional color, highly productive

Wide format color print, copy and scan system

What if you were able to print an E-size color plot in 60 seconds, and monochrome plot in 40 seconds? How would this help meet your increased demands for color production and achieve fast printing of your existing monochrome volumes—in one system?

What if when you needed to print, copy and scan large color files, your color system could perform the tasks simultaneously? How would this reduce bottlenecks and improve throughput allowing you to concentrate on your core business functions?

What if your color system automatically optimized the print quality and print speed when printing lines, text, and images on the same page? How would this make printing easier, resulting in more prints per day with less effort?

Experience uncompromising productivity with the Océ TCS500 and no longer ask yourself “what if.”

Improve and expand your current color capabilities

The Océ TCS500 delivers a fully integrated system with robust color printing, copying and scanning capability that is as easy to use and reliable as any Océ system.

Océ Dynamic Switching technology simplifies printing

Whether your original contains lines/text, images or both, Océ Dynamic Switching technology eliminates the guesswork and the need to choose multiple complex print settings. Océ Dynamic Switching technology is inherent in the release mode, resulting in only having to select one setting. Only Océ Dynamic Switching technology automatically prints images in high quality and lines/text at full speed in the same document.

Convenient color management gives you full control of your color output

You can select the right color profiles to meet international standards and create a workflow that best fits the type of output. If you want to print the same output color as other devices you use (or have used in the past), the Océ TCS500 gives you the option to emulate other inkjet devices. In addition, a CAD color option is available for printing strong color lines for drawings.

Fast file processing and full queue control shortens printing time

With its processing power and large memory, the Océ Power Logic® controller processes large color files quickly and reliably. Productivity with the Océ TCS500 will save time and positively

affect your bottom line due to concurrency of the Océ Power Logic controller. This means that files process, print, copy and scan simultaneously. Queue management allows users to change settings of printed jobs or jobs on hold, prioritize rush jobs, and reprint processed jobs. This means you can produce a quick monochrome check plot on standard paper as a proof source before printing the final full-color drawing with presentation quality on your desired media.

Control your costs while increasing profitability and turnaround time

The advanced technologies of the Océ TCS500 scanner ensure optimal image copy quality. Proven Océ Image Logic® technology has set the standard for consistently, excellent copy quality. It enhances scanned images and brings the highest level of quality to your copied and scanned documents. In addition, the Océ TCS500 can easily accommodate large format hard copy originals and color mark up drawings for distribution and archiving with Océ's Green Button approach.

True work-horse productivity with the Océ TCS500

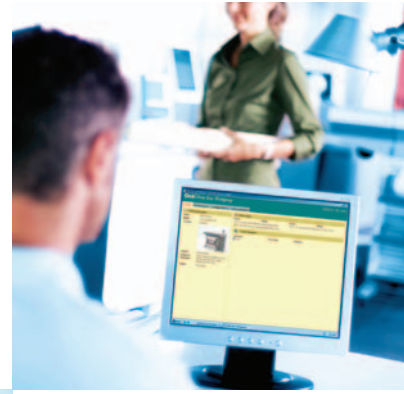

Consistent with every professional Océ system, the Océ TCS500 is designed for sustained high performance, saving you time and avoiding unnecessary interruptions. For instance, you have the ability to change the media and ink tanks while the system is printing, maximizing your time to focus on your core business functions. In addition, the system can be configured with up to three rolls of media, an overnight printing mode, and finishing capabilities accommodating up to 200 E-size plots.

The Océ TCS500 total solution offering

You can establish a technology growth path with the Océ TCS500. Start with a productive printer today and add copying and scanning capabilities as your workflow requires. This protects your initial investment and allows you to grow in the future.

The Océ advantage

Océ brings one-stop shopping to your entire document creation, archiving, handling, and distribution operation. Our award-winning service organization provides you with a quick response, and Océ Imaging Supplies offers you a quality line of ink and media products.
